### DETAILED ACTION

1. This application has been reviewed; the objections and rejections cited are as stated below.

#### *Claim Rejections - 35 USC § 112*

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

4. Regarding claim 1, the phrase "may be" renders the claim(s) indefinite because the claim(s) include(s) elements not actually disclosed (those encompassed by "or the like"), thereby rendering the scope of the claim(s) unascertainable. See MPEP § 2173.05(d).

#### *Claim Rejections - 35 USC § 103*

5. The following is a quotation of 35 U.S.C. § 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 1-16 are rejected under 35 U.S.C. § 103(a) as being unpatentable over McCollum (US. 6,427,168) and Smart Technology Enablers "SmartCIM™ to DMI Mapper" (herein after "Smart")

Art Unit: 2143

7. Regarding claims 1-16, McCollum discloses a method apparatus and a computer program for, CIM clients to communicate request response between CIM client and proxy CIMOM, (Fig. 3). McCollum does not explicitly teach the use of CIM-DMI for interfacing between CIMOM and DMI application, but suggested that vendors' specific protocol such as DMI can be used for such communication (Col.5, line 59, Col.6, 1.2). However, in an analogous art, Smart teaches "SmartCIM™ to DMI Mapper", which could be used to interface between CIMOM for translating request, response, interrupt or other desirable communications between CIM and DMI (see whole document). Thus, it would have been obvious to one of ordinary skill in the art at the time of the invention was made to incorporate Smart teaching with McCollum to enhance system efficiency.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bunjob Jaroenchonwanit whose telephone number is (703) 305-9673. The examiner can normally be reached on 8:00-17:00.
